SOMERSET FLOWER FARM

About Flower Tree

LOCALLY GROWN

Just outside Taunton at Hillcommon is our farm. We grow seasonal British flowers in 2 acres of flower fields and polytunnels.

OUR COMMUNITY

We grow our beautiful flowers for florists, weddings, and local flower lovers. We propagate annuals, biennials and perennials and grow them into plug plants for fellow growers (both large and small) locally and nationwide.

SUSTAINABILITY & QUALITY

We have a sustainable approach to everything we do. Our flower farm is off grid, using solar panels for our flower fridge in the summer and propagating benches in the winter. We are proudly free from air miles, floral foam, chemicals and single use plastic. Our flowers are all propagated from seed or cuttings on site and we create our own compost to improve our soil each year.

We care about the details, from providing stunning flowers to building lasting relationships with our customers.

We sell a range of annual, biennial and perennial plants. All our plants are varieties that make wonderful cut flowers and come in two sizes: 9cm pots or plug plants (approx 5cm). We sell our plants online through our website and directly from the flower farm in Somerset.

Whether you are hobby growers or large scale flower farmers, our plants are perfect if you don't have the time or space to propagate the quantity of plants you require.

Our packaging is 100% compostable. We use cardboard, newspaper, and wax paper to package our plants.
